8 Port PoE Switch

Background

Located in Rautatiekatu 19, Asunto Oy Oulun Asemantorni I is a 76-unit apartment building completed in 2019, which is close to the city center. The apartment management center acknowledges that security plays a crucial role in influencing the stability and sustainability of operations. Therefore, they desired to install a security system that could help them in monitoring parking garages, bicycle parking as well as yard areas while withstanding the possible vandalism.

Challenge

With a growing population of residents, apartment management staff must remain vigilant at all times to protect their residents' assets. Thus, a comprehensive and 24x7 security system was needed to protect residents and employees.

Solution

Milesight provides a complete solution of IP video surveillance, comprising the 2MP Vandal-proof Mini Dome Camera, 5MP AF Motorized Mini Dome Camera, 4K Pro NVR 5000 Series, and several types of Port PoE Switches.

Superior Image Quality

Milesight 2MP Vandal-proof Mini Dome Camera and 5MP AF Motorized Mini Dome Camera can provide up to 5MP resolution and capture full-color images in extremely low-light conditions reaching 0.002Lux without any supplement lighting.

High-class Durability

Besides, these cameras are housed in a vandal-proof casing, allowing them to withstand harsh vandalism, rendering these models ideal for both indoor or outdoor applications, such as yards and basements.

Exquisite Design

Two different types of mini dome cameras have been deployed in and around the apartment for monitoring. Both are ultra-mini size cameras, which makes installation quick and easy. The well-designed integrated junction box especially the clamshell structure presents a neater means of concealing electrical junction.

A Robust and Intelligent System

Moreover, all devices were managed by Milesight 4K H.265 Pro NVR 5000 Series. It offers up to 20TB storage capacity, 4K video viewing experience and empowers users to set up and manage advanced IP surveillance systems with ease.

Result

Milesight devices are well managed in a hierarchical system structure, enabling the monitoring, recording, playback and event trigger management with ease-of-use and efficient control. "We have been very satisfied with the high-quality products offered by Milesight and the efficient and professional service provided by RTJ Group Oy, enabled us to observe site safety in real-time and guarantee our overall residences property security", says Property Manager Vesa Heikkinen from Kiinteistötahtola.
